

The Hollywood Food Coalition bears witness to the repercussions of systemic racism every single night.

Far too many of the clients that we serve are African American.

African Americans are 34% of people in Los Angeles experiencing homelessness, while only 9.8% of the total population.

This is shameful and unacceptable.

Long-engrained attitudes and policies that have kept African Americans marginalized and disenfranchised have got to change.

Just as we believe that everyone deserves a hot meal every night, we believe that every single African American deserves the right to dignity, respect, happiness, and peace of mind.

We support those who are advocating with such tremendous courage for this vision.
